

Extended Reach and Deep Rack Server Support

FE-3X Shelf Extender

Makes face-mounted and fixed-rail installations easy by providing rigid support for the server deep into any rack.

For use with the ServerLIFT SL-500X Front Loading Lift, the FE-3X Extended Shelf nearly doubles the forward reach of the SL-500FX platform. It is ideal for the installation or removal of face-mounted or fixed-rail-mounted servers.

The SL-500FX Front Loading lift and FE-3X Extended Shelf combo is perfect for facilities with wide aisles and for manufacturers loading into cabinets mounted on pallets.

Great for Manufacturers and Systems Integrators:

- ✓ Holds equipment in place much deeper into the rack
- ✓ Server support and positioning for fixed-rail and face-mounted installs
- ✓ Reaches across the lip of the pallet, supporting servers into skid-mounted cabinets
- ✓ Thin profile facilitates space-efficient server stacking
- ✓ Supports up to 500 lbs (226 kg) at the center and 300 pounds (136 kg) at the extended front edge
- ✓ Adds 9½ inches (24 cm) to the extended SL-500FX platform for a full 20 inches (50 cm) of forward server support
