serverLIFT

Friction-Free Server Transfers
GT-1000X™ Bi-Directional Glide Table

The GT-1000X™ Glide Table lets you slide servers and switches on or off the ServerLIFT platform for an effortless server move... every time.

Users Love It Because:

✓ Reduces the effort necessary to rack IT equipment

✓ No-sweat server unpackaging and leveling

✓ Brake handle locks out rollers to keep servers stationary

✓ Attaches to the platform of all ServerLIFT-brand data center lifts

✓ Can also be attached to and used in conjunction with the RL-500 Riser

✓ Can be attached for right or left hand operation on an SL-500FX Front Loading lift

Frictionless Server Movement

The GT-1000X Glide Table allows servers to glide back and forth over its surface for nearly frictionless equipment transfers on either side of an aisle.

✓ Overall dimensions (not including brake handle): 24"L x 14.63"W x 1"H

✓ 1000 lb (454 kg) maximum load capacity*

  * Superseded by the max load capacity of the ServerLIFT model unit to which it is attached.
