

STREAMLINE SERVER DEPLOYMENT INCREASE SAFETY • REDUCE COSTS

WHAT THE PROS KNOW

A safe environment where server moves are easy and streamlined can improve the bottom line. The pros do the right thing and never compromise, improving health and morale and reducing time and money spent on installs.

WHAT DO YOU NEED TO RACK LIKE A PRO?

- ✓ Smart, purpose-built features and functions
- ✓ Equipment that enhances your DC ops
- ✓ A lift that works with and for you effortlessly
- ✓ Server-handling products which eliminate risk
- ✓ Quality that lasts

STREAMLINE SERVER DEPLOYMENT

Our professional-grade data center lifts can deploy multiple servers simultaneously, with installations and removals handled by just one tech ...every time. Award-winning ServerLIFT devices reach all rack positions – down to the floor and to the top of the highest non-standard racks. They navigate facilities and floor obstructions easily and smoothly. Equipment can be angled and supported for precision installation.

INCREASED SAFETY

The pros use our lifts because of the 100% accident-free record reported by our clients. CE, FCC, IC, and UL certifications ensure hardware lifting solutions won't harm people or equipment. Pinch points are eliminated with open, accessible design.

REDUCE COSTS

Use one tech for every installation • Eliminate injuries • Reduce employee downtime • Never waste time and money again on a lift that wasn't built for the data center

THE PROS GO TO SERVERLIFT

Our solutions result in increased safety, streamlined server deployment, and reduction of costs which attract professionals from the data center industry. Our global client base rely on the quality we deliver. Once you have professional-grade equipment, you can Rack Like a Pro.

WE'RE TRUSTED BY THESE GREAT COMPANIES & MORE

“ We love our ServerLift [unit] here at NCCMedia. Most thought I was getting lazy for ordering it. Those ideas changed after we put it into use. I had one employee de-rack a full HP blade chassis by himself. That's over 400 pounds! Wonderful product and we show it off to visiting vendors that sell us equipment that needs to be racked. We give it five stars out of five.”

- David Smith, Director of Network Services
